DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claims 1-4 provides for the use of a polymer, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

(b) Claims 1-4 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

(c) Claims 1-17 are indefinite because in claims 1 and 5 (and all claims dependent thereon) it cannot be determined whether the phrase "comprising as comonomers to ethylene at least two C₄₋₁₂ alpha olefins" is meant to require: a) two ethylene copolymers wherein each includes a different C₄₋₁₂ alpha olefin, or b) a terpolymer wherein ethylene is copolymerized with two C₄₋₁₂ alpha olefin monomers.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5-7, 9, 10, 14, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lequeux et al. (US 2005/0170112).

The reference discloses multimodal polyethylene for the making of injection moldings comprising a lower MW ethylene homopolymer or copolymer and a higher MW ethylene copolymer comprising one or more of butene, pentene hexene or octene ([0006]-[0013]). Although unexemplified, one of ordinary skill in the art would be motivated to include a terpolymer of ethylene with two of butene, pentene, hexene or octene because such use has been suggested in [0013]. Although unreported, the claimed low levels of extractables and migration would be expected in view of the recommended use of metallocene catalysts ([0015] – [0044]).

Priority

4. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in GB on 7/21/2003. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of the correct foreign application. Specifically, the declaration

Art Unit: 1713

claims priority to GB 0317012.0; however, the correct application number is 0317012.3.

A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.
